

AMENDMENTS TO THE CLAIMS

1. (currently amended) A sauna cabin assembly system, for enabling the assembly of a front panel of a sauna cabin to each of a pair of side panels of the sauna cabin, so as to hide a plurality of securing elements for securing the front panel and each of the pair of side panels together, comprising:

a plurality of securing elements, including a plurality of front panel edge securing elements, each of which comprises a front panel edge bracket which includes a pair of side secureable portions and a medial interengageable portion, and a plurality of side panel edge securing elements, each of which comprises a side panel edge bracket which includes a pair of side securable portions and a medial interengageable portion, wherein the front panel edge bracket medial interengageable portion is ~~which are~~ complementary to and interengageable with the side panel edge bracket medial interengageable portion ~~plurality of front panel edge securing elements~~, to enable the assembly of the sauna cabin front panel to each of the pair of sauna cabin side panels, so as to hide the plurality of securing elements.

2.-6. (cancelled)

7. (currently amended) The system of claim 1 ~~[[4]]~~, wherein each of the plurality of front panel edge brackets comprises a generally w-shaped bracket.

8. (currently amended) The system of claim 1 ~~5~~, wherein each of the plurality of side panel edge brackets comprises a generally m-shaped bracket.

9. (currently amended) A sauna cabin assembly system, for enabling the assembly of a front panel of a sauna cabin to each of a pair of side panels of the sauna cabin, so as to hide a plurality of securing elements for securing the front panel and each of the pair of side panels together, comprising:

securing means, including front panel edge securing means, each of which comprises a front panel edge bracket which includes a pair of side secureable portions and a medial interengageable portion, and side panel edge securing means, each of which comprises a side panel edge bracket which includes a pair of side securable portions and a medial interengageable portion, wherein the front panel edge bracket medial interengageable portion is ~~which are~~ complementary to and interengageable with the side panel edge bracket medial interengageable portion ~~front panel edge securing means~~, to enable the assembly of the sauna cabin front panel to each of the pair of sauna cabin side panels, so as to hide the securing means.

10. (currently amended) A method of assembling a sauna cabin, for enabling the assembly of a front panel of the sauna cabin to each of a pair of side panels of the sauna cabin, so as to hide a plurality of securing elements for securing the front panel and each of the pair of side panels together, in a system which includes a plurality of securing elements, including a plurality of front panel edge securing elements, each of which comprises a front panel edge bracket which includes a pair of side secureable portions and a medial interengageable portion, and a plurality of side panel edge securing elements, each of which comprises a side panel edge bracket which includes a pair of side securable portions and a medial interengageable portion, wherein the front panel edge bracket medial interengageable portion is ~~which are~~ complementary to and interengageable with the side panel edge bracket medial interengageable portion ~~plurality of front panel edge securing elements~~, to enable the assembly of the sauna cabin front panel to each

of the pair of sauna cabin side panels, so as to hide the plurality of securing elements, wherein the method comprises:

assembling the sauna cabin front panel to each of the pair of sauna cabin side panels, comprising interengaging the plurality of front panel edge securing elements with the complimentary and interengageable plurality of side panel edge securing elements.

11.-15. (cancelled)

16. (currently amended) The method of claim 10 ~~13~~, wherein each of the plurality of front panel edge brackets comprises a generally w-shaped bracket, and wherein interengaging comprises interengaging the plurality of generally w-shaped front panel edge brackets with the complementary and interengageable plurality of side panel edge brackets.

17. (currently amended) The method of claim 10 ~~14~~, wherein each of the plurality of side panel edge brackets comprises a generally m-shaped bracket, and wherein interengaging comprises interengaging the generally m-shaped side panel edge securing elements with the complementary and interengageable plurality of front panel edge securing elements.

18. (currently amended) A method of assembling a sauna cabin, for enabling the assembly of a front panel of a sauna cabin to each of a pair of side panels of the sauna cabin, so as to hide a plurality of securing elements for securing the front panel and each of the pair of side panels together, in a system which includes securing means, including front panel edge securing means, each of which comprises a front panel edge bracket which includes a pair of side secureable portions and a medial interengageable portion, and side panel edge securing means each of which comprises a side panel edge bracket which includes a pair of side securable portions and a medial interengageable portion, wherein the front panel edge bracket medial interengageable portion is ~~which are~~ complementary to and interengageable with the side panel edge bracket medial interengageable portion ~~front panel edge securing means~~, to enable the assembly of the sauna cabin front panel to each of the pair of sauna cabin side panels, so as to hide the securing means, wherein the method comprises:

assembling the sauna cabin front panel to each of the pair of sauna cabin side panels, comprising interengaging the plurality of front panel edge securing means with the complementary and interengageable plurality of side panel edge securing means.
